Owners:
Oshie and Rechama Jacobovitch

When did you open your business in Solon?

Building Blocks Therapy opened on September 9th, 2021!

Why did you choose to locate in Solon?

We moved to Solon because we love the area! Several of our current clients, who live in Solon, were traveling to our Highland Heights Center and we wanted to be closer to them as well as clients who drive from as far as Akron and beyond. We felt it was a great location for our current clients as well as for new clients who need the services in the area.

What do you specialize in?

Building Blocks Therapy specializes in Applied Behavior Analysis (ABA) for children ages 2-20 with Autism Spectrum Disorder.

What sets you apart from other businesses like yours?

We offer high-quality ABA, along with speech, occupational, and physical therapy and work as a collaborative interdisciplinary team in order to service our clients in the best possible way. We're an out of the box, individualized, developmental family-centered and play-based facility that sets our clients' needs as our top priority. We consult with top experts in our field to ensure a high standard of care. We also offer school and home-based services.

What else would you like the residents of Solon to know?

We're really looking forward to servicing the wonderful Solon community!
