Aurora Road Reconstruction, Phase 1

Work Completed This Week:

A resident's meeting was held on September 11, 2023 to describe to residents what to expect during the construction project on Aurora and Liberty Roads. A brochure summarizing highlights of the information provided at the meeting is being delivered to all affected residents this week. Tri Mor will be handing out a notice to all residents this week as well.

2-Week Look Ahead:

Tri Mor is scheduled to mobilize equipment to the site on September 25, 2023. They will begin by setting up the initial traffic maintenance zone allowing for only one-way traffic in the eastbound direction from the traffic signal at Burger King to Liberty Road as well as the associated detour routes. They will saw cut the water main trench. Waterline materials will be delivered to the jobsite and staged along the work zone. Waterline work will begin by tying into the existing water main at 34501 Aurora Rd at night as required by the Cleveland Water Department because the process will require shutting off the water from 34501 Aurora Road to SOM Center Road. They will then proceed to install water main from the west end of the project toward Liberty Road on the south side of Aurora Road.
